Under the joint aegis of the Career Guidance and Placement Cell and the Department of Computer Science—and under the guidance of College Principal Dr. Anil Kumar Taneja and Career Guidance Cell Convener Dr. Sunny Kapoor—a specialized training program **“Drone & Geospatial Technology, Applications and Career Opportunities”** was successfully organized on April 17, 2026. The objective of this program was to familiarize students with emerging technologies and their practical applications. The program featured Dr. Amarjit Singh Randhawa (Drone Pilot at the Skyline Institute of Geoinformatics), Mr. Ajay Punia (Senior Manager, Academics), and Ms. Himanshi Batra (Junior Manager, Academics) as the keynote speakers. The speakers provided detailed insights into drone operations, the various applications of geospatial technologies, and the career opportunities available in this field. They said AI gives drones a brain, and that brain helps humans solve big problems faster and safer.

The program commenced with a welcome address by Dr. Rashmi Chhabra, in which she highlighted the significance of modern technological knowledge. She told the students that when AI is added to drones, they can think, see, and make decisions without a person controlling them every second. The proceedings were skillfully anchored by Dr. Reena Katyal. Dr. Deepti Sharma, Ms. Lakshya, Ms. Kirti, Ms. Ankita, Ms. Madhu, Ms. Preeti, and other faculty members were present on the occasion. The program concluded with a vote of thanks delivered by Dr. Pooja Chawla, who expressed her gratitude to all the guests, organizers, and participants. This program proved to be highly informative and inspiring for the students, motivating them to explore new opportunities within the fields of drone and geospatial technologies. 75 students participated in the workshop with full zeal and enthusiasm. Students who attended drone workshop had shared very positive and exciting feedback, “This is the best class ever” because they learn by doing, not just reading.
